

The Meadowbrook School

Education Pathways Student Shadow Program

Student Shadows Program (8th Grade Students)

The **Student Shadows Program** is a one-day educational experience designed for **8th-grade students** from partnering private schools who are interested in exploring the field of education. Through this program, students will have the opportunity to shadow an elementary school teacher and observe the daily routines, classroom environment, and interactions that make up a teacher's day.

Participants will:

- Spend the day observing a classroom teacher during lessons, transitions, and activities.
- Learn about the roles and responsibilities of educators in an elementary school setting.
- Reflect on their experience and gain insight into teaching as a potential career path.

This program is strictly **observational**. Students will not engage in instructional duties or provide assistance to teachers or students. The goal is to offer an authentic look into the teaching profession in a structured, supportive environment.
